

Identifying identical pictures: In each row, circle the picture that matches the one in the frame. Ask your child to identify at least one feature in the first picture before looking for a match.

Tip for parents: Take pictures of your child's block creations before they are torn down. Later, challenge your child to recreate the structure using the photo.

Why keep the fun all to yourself? Please feel free to share this worksheet with friends. See more at [KiDoTi.com](https://www.kidoti.com)
