

FINE MOTOR

Cutting lines: Ask your child to cut along the line using long, smooth snips. Remind your child to hold the paper in his non-dominant hand, moving the paper to create the direction changes.

Tip for parents: Challenge your child to cut as many squares as he can out of a single piece of paper. Then show him how to turn each square into a triangle or rectangle with just one additional snip.

Why keep the fun all to yourself? Please feel free to share this worksheet with friends. See more at [KiDoTi.com](https://www.KiDoTi.com)
