

Matching pictures to shadows: Draw a line between each picture and its shadow. Direct your child to focus on details such as curves or angles in the outline of each full-color picture.

Tip for parents: Print two copies of some family photos so that some pictures will be identical. Show your child three photos and ask him to pick out the two photos that match.

Why keep the fun all to yourself? Please feel free to share this worksheet with friends. See more at KiDoTi.com
